

## UCOS Applications Team Mission Statement

The mission of the UCOS Applications Team is to foster global collaboration and goodwill between all FMC Technologies' regions in order to proactively develop forward-looking, zero-defect and modular-based functionality and standards, while maintaining clear boundaries between product-specific, project-specific and application-specific needs.

### • UCOS Core Product

The UCOS Applications Team will assist the Development Team in addressing issues and advancing the UCOS Core Product through defect reports and feature requests.

### • UCOS Project Execution

The UCOS Applications Team will assist the Project Execution Team in addressing, meeting and exceeding both customer-specific and project-specific requirements by supplying robust standardized functionality and assembly guidance within a strong collaborative and open communication environment.

### • UCOS Support

The UCOS Applications Team will aid the Support Team in rapidly resolving field issues and increase the UCOS Core Product and Application knowledge base.

### • Vision and Professionalism

The UCOS Applications Team will strive for continuous improvements in functionality and assembly tools via professional implementation based on formalized documentation, training and test procedures.
